

8th of April 2020

Dear Parents and children,

We wish you are all well and that you spend your time creatively with your family.

We would like to inform you that we have created a new category named **LINKS which concerns links to useful websites with educational material.**

Today, we post the following,

- 1. Website links from government services with pedagogical and psychological support material**
- 2. (A) The link of the website of the Network of Environmental Education Centers of the Ministry of Education with related activities for children and
(B) A document from the Foundation for Environmental Education FEE (Foundation for Environmental Education) which has prepared a relevant form that refers to links to activities for kindergarten children but also for older children (most families have older children so it will be useful). The relevant material has been sent to schools by the CYMEPA (Cyprus Marine Environment Protection Association) through the Ecological Schools curriculum.**
- 3. Website links for children use with educational material (Language, Maths, Paint)**

Also, the following links posted in the previous days have been moved to this category:

- 4. Links with ideas for dance (songs with movements) and gymnastic
We have songs in Greek and English language**
- 5. Website links for watching theatrical performances**

For this category, we have prepared other material that we will post from time to time.

**We stay home, we stay safe!
Natasa, Maria, Laura**
